

Cleaning cutter system

CT-400-S

DATA

This machine uses a cleaning unit to remove dust from both sides of roll material and then cuts and loads the material at a set size.

Its shearing blade cutting adjustment mechanism has been designed to incorporate a fine-tuning mechanism that applies the perfect amount of pressing force allowing it to cut a variety of materials.

<Simple Overview>

- Machine dimensions: Approx. (W) 2100 x (D) 1120 x (H) 1380 mm
- Effective length: 400mm
- Supply voltage: Supports various types
