

RTR dry-film laminator

DH-R250C

DATA

This machine is an all-in-one RTR laminator that has been developed with a compact design. In addition to tension control and EPC control, it utilizes an airshaft that makes prearrangement easy. It also has a built-in cleaning unit which is used prior to the dry-film affixing. It incorporates all of the elements that are necessary for FPC lamination, including dry-film tension control and winding shaft EPC control.

<Simple Overview>

- | | |
|-----------------------|--|
| • Machine dimensions: | Approx. (W) 1200 x (D) 1175 x (H) 2100±30 mm |
| • Processing speed: | 0.3 - 3 m/min |
| • Workpiece size: | (W) 250 mm (Thickness) 0.03 - 0.1 mm |
| • Supply voltage: | Supports various types |
